EXPERIENCE

Front-end Developer | Mestixa Menú   *Jan-Feb 2025*

I developed a solution that redirects a QR code to a digital restaurant menu, featuring a catalog of food and beverages with prices, descriptions, and client-specified customizations in layout, design, and menu personalization. For the frontend, I used React and Tailwind CSS, while JavaScript handled dynamic functionalities. I collaborated using a Git-based workflow to ensure efficient version control and teamwork.

Full-Stack Developer | Arca Menú   *Dec 2024*

I contributed to the development of a solution that redirects a QR code to a digital restaurant menu, featuring a catalog of food and beverages with their prices and descriptions in both English and Spanish. My role included collaborating on both the development and design of the project, ensuring an intuitive and visually appealing user experience. I utilized React and Tailwind CSS for building the frontend, while JavaScript was used to implement dynamic functionalities. I worked with a collaborative Git-based workflow and deployed the project on Vercel, ensuring optimal performance and availability

---

HIGH SCHOOL

- Escuela Normal Manuel Belgrano, Social Sciences and Humanities, 2015-2021

COURSES

• Bootcamp Full-Stack Developer SoyHenry, 2023-2024

SKILLS

- Advanced English
  https://cert.efset.org/eWPPFZ
- Teamwork
- Problem solving

- JavaScript, TypeScript, HTML, CSS
- React.js, TailwindCSS, Redux.js, Node.js, Express.js, PostgreSQL, Git, GitHub

---

OBJECTIVES AND INTERESTS

- Acquire knowledge and experiences
- Perform well in assigned tasks
- Be part of a work team
